

Abhishek Kumar

Product Manager | AI, B2B SaaS, data, energy and fintech

Dublin, Ireland | abhishzk.ie@gmail.com | abhishzk.com | linkedin.com/in/abhishzk

Product Manager with an engineering background and hands-on ownership from discovery through adoption. Built 0-to-1 data and AI products, improved enterprise SaaS engagement, and led delivery across internal and external teams. Strong at turning ambiguous customer and production evidence into clear product decisions, measurable success criteria, and trusted releases.

SELECTED PRODUCT IMPACT

3,500+ VisaJobs candidates	84% platform session growth	95% PDF bill accuracy	28+ AI product integrations
--------------------------------------	---------------------------------------	---------------------------------	---------------------------------------

EXPERIENCE

Founder and Product Manager VisaJobs Ireland Dublin, Ireland	Jan 2026 - Present
- Founded and lead a searchable sponsorship data product used by 3,500+ candidates across 142 nationalities, covering 204,612 permit records, 22,800+ employers, and 4,400+ live jobs. - Turned fragmented government permit data into sponsor verification, company comparison, live job search, permit tools, and application tracking with clear evidence and source boundaries. - Validated demand through 51,000+ launch-post views and 1,400+ click-throughs, then expanded the candidate product into a verified employer platform from inbound market feedback.	
Product Owner Watt Footprint Dublin, Ireland	Jul 2025 - Dec 2025
- Owned product backlog and roadmap across web and mobile for a multi-tenant energy SaaS platform, aligning a nine-person internal and external group through two-week delivery cycles, clear acceptance criteria, and release quality gates. - Instrumented and reviewed Amplitude product analytics, using customer behavior and production evidence to prioritize deeper enterprise use and drive 84% session growth from H1 to H2 2025. - Delivered Bill Reader v2 and v3 using AWS Textract for extraction, OpenAI for structured validation, and focused human review, reaching 95% PDF accuracy, 80% image accuracy, and 80% less processing time. - Led product readiness for the first UK and UAE enterprise deployments across engineering, operations, and commercial teams, maintaining 100% logo retention during the engagement.	

EXPERIENCE CONTINUED

Product Manager
Speeir | Athlone, Ireland

Sep 2024 - Jun 2025

- Owned product vision, discovery, prioritization, pricing, and delivery across two 0-to-1 B2B SaaS products in a lean five-person team.
- Built and launched an AI search platform integrating 28+ external services across LLM providers, vector search, payments, authentication, and web search.
- Delivered a multi-tenant fitness management platform across web and mobile, translating user interviews and business requirements into PRDs, prototypes, and production-ready backlogs.

Software Engineer, Payments Network
Mastercard | Dublin, Ireland

Jun 2022 - Jan 2023

- Built event-driven payment processing systems on live-grade financial infrastructure, supporting production-like testing for 300+ merchant onboardings across multiple geographies.
- Raised automated test coverage from 82% to 97% and implemented PCI and PII data controls, developing the technical judgment I now use in regulated product decisions.

PRODUCT PRACTICE

Discovery and strategy	Customer interviews, jobs-to-be-done, market framing, roadmaps
Prioritization and delivery	Outcome framing, PRDs, user stories, acceptance criteria, release gates
Analytics and evaluation	Amplitude, adoption metrics, AI evaluation, production failure analysis
Collaboration	Engineering, design, data, QA, operations, commercial and executive stakeholders
Product domains	AI products, B2B SaaS, data products, energy technology and fintech
